Introduction to

DecodemyBrain

The Science of How You Think

The Path to Self-Growth.

DecodeMyBrain is a groundbreaking self-discovery and personal development tool that enables individuals to understand how they naturally think, learn, decide, and grow. Developed under the guidance of renowned neurologist and thought leader Dr. Sweta Adatia, and inspired by the best-selling book Future Ready Now, this tool supports a lifelong journey of self-awareness, clarity, and transformation. DecodeMyBrain offers a modern, science-backed approach to help individuals navigate their educational, professional, and personal lives with confidence and purpose.

At its core, DecodeMyBrain is built around the understanding that we all have dominant and non-dominant thinking styles. Instead of boxing people into fixed categories, it encourages exploration and development of the full spectrum of the mind. The process reveals an individual's natural strengths—whether analytical, practical, relational, or creative—and provides a clear, personalized roadmap to expand their potential through whole-brain engagement and growth.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

The Four Brain Types

The aim is to recognize your dominant thinking style to excel in it, while consciously developing the others to unlock your full whole-brain potential.

The four brain types; Analytical, Creative, Practical, and Relational, serve as the cornerstone of this methodology. They represent the primary cognitive preferences that shape how individuals process information, make decisions, and engage with the world. Each type offers a metaphorical lens through which we understand how people approach life's challenges, opportunities, and interactions:

Analytical Brain

This brain type is the strategist, the problem-solver. It thrives on data, facts, and logical reasoning, helping individuals navigate challenges with precision and clarity.

Creative Brain

The imaginative thinker, this brain type is driven by innovation and vision. It processes information in a fluid and artistic manner, providing insights into the world of possibilities.

Practical Brain

Focused on execution and task management, this brain type is grounded in doing. It turns ideas into actions, ensuring that goals are met efficiently and effectively.

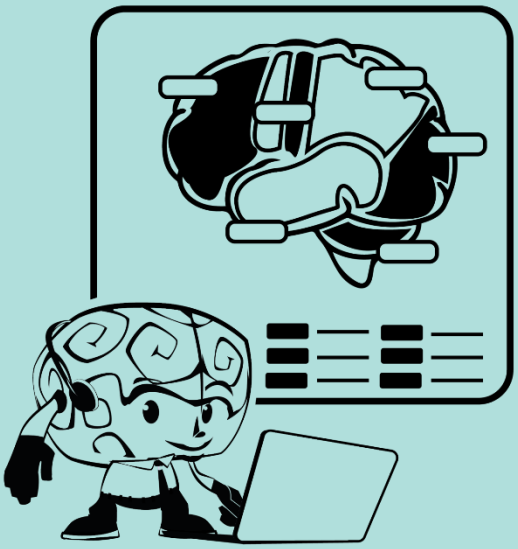

Relational Brain

The empathetic and socially attuned brain type, it excels in understanding emotions, building connections, and fostering relationships. It plays a key role in emotional intelligence and social interactions.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

The Four Thinking Styles

01. The Thinking Style Is Analytical

This style is characterized by precision, logical reasoning, and data-driven thinking. Analytical thinkers enjoy solving problems, interpreting facts, and making objective decisions. They ask, “What are the facts?” and seek clarity, accuracy, and results.

Key Strengths:

- Strategic planning
- Data analysis and financial logic
- Focused decision-making
- Goal-setting and structured problem-solving

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

The Four Thinking Styles

02. Organizer Thinking

Practical organizers thrive in structured environments. They value order, discipline, and planning. With a methodical mindset, they are the ones who build systems, follow processes, and ensure things get done efficiently.

Key Strengths:

- Planning and scheduling
- Reliability and time management
- System building and execution
- Detail orientation

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

The Four Thinking Styles

03. The Relational Thinking

Relational thinkers excel in understanding people and emotions. They are empathetic, intuitive, and relationship-driven. They bring warmth, collaboration, and emotional insight into teams and social settings.

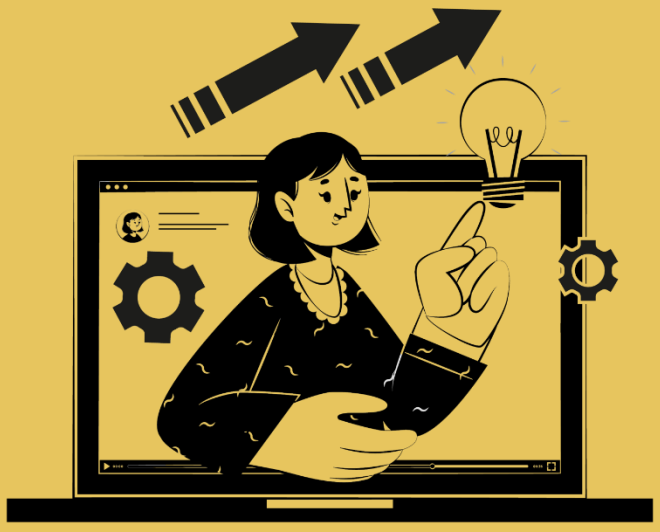

Key Strengths:

- Emotional intelligence
- Communication and team building
- Supportive leadership
- Deep listening and interpersonal sensitivity

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

The Four Thinking Styles

04. The Creative Thinkers & Visionaries

Creative thinkers are future-oriented, imaginative, and unconventional. They are driven by big-picture ideas, innovation, and curiosity. These individuals are comfortable with ambiguity and thrive in environments that allow them to experiment and innovate.

Key Strengths:

- Innovation and ideation
- Vision casting and future planning
- Risk-taking and adaptability
- Out-of-the-box thinking

Flow and Grow®

Expanding the Whole Brain

What sets DecodeMyBrain apart is its unique "Flow and Grow" feature, which empowers individuals to actively develop their less-dominant thinking styles. Through immersive experiences, targeted learning, and practical exercises, users can build cognitive flexibility, emotional resilience, and true whole-brain integration.

This comprehensive approach nurtures not only career advancement but also emotional well-being, creative growth, and meaningful relationships. Whether you're aiming to enhance leadership skills, improve study habits, master communication, or align your career path with your natural brain preferences, DecodeMyBrain provides actionable tools and insights for every phase of life.

Understanding Your 4 Brain Types, Cognitive Skills & Whole Brain Pathway

DecodemyBrain

The Science of How You Think

Your DecodeMyBrain™ report reveals **how your brain prefers to think, learn, decide, communicate, and relate to the world**. It combines the **4 Brain Types**, **Left–Right orientation**, **Upper–Lower processing**, **Cognitive Skills**, and **Behavioral Indicators** to create a simple, accurate brain map.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Understanding Your Brain Map

DecodeMyBrain™ Report Overview

Your report reveals how your brain prefers to think, learn, decide, and communicate. It combines **4 Brain Types**, **Left–Right orientation**, and **Upper–Lower processing** to create a simple, accurate brain map.

ecodemyBrain
The Science of How You Think

Analytical Brain (Left–Upper): Logic, reasoning, precision, evidence.

Practical Brain (Left–Lower): Structure, routines, planning, discipline.

Relational Brain (Right–Lower): Emotions, empathy, connection.

Creative Brain (Right–Upper): Ideas, imagination, innovation.

How To Read Your Report

Step 1 – identify left or right brain orientation

- **Left brain total**: Analytical + Practical
- **Right Brain Total**: Creative + Relational

Whichever is higher shows whether your processing is **logical-sequential** or **intuitive-holistic**

Step 2 – Identify Upper or Lower preference

- **Upper Brain Total**: Analytical + Practical -> Big picture, Ideas, Strategy
- **Lower Brain Total**: Creative + Relational -> Execution, Order, People

This reveals if you lead with **concepts or action and connection**

Step 3 – Read Each Quadrant Individuality

Your 4 percentages show the strength of each brain type.

- The **top two highest** -> your dominant preferences
- These shape your **behaviors, decisions, style of learning and thinking**
- The lowest quadrant -> your blind spot and greatest opportunity for growth

Step 4 – Introvert or Extrovert Expression (Relational Quadrant)

Relational Brain has two forms:

- **Introverted Relational:** deep emotions, listening, empathy
- **Extroverted Relational:** expressive, social, communicative

This helps understand your social energy and communication style

Step 5 – Review the 6 Cognitive Skills

Your cognitive explain how your brain executes tasks, not just how it prefers to think:

Analytical Skill, Realistic / Practical Skill, Protective / Error-Checking Skill, Organizational Skill, Strategic Skill

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Important Considerations

Honesty & Development

Honesty Matters

Your report reflects your inner truth.
For accurate results:

- Answer honestly
- Do not overthink
- Do not choose what you “wish to be”
- Do not try to look balanced

Cognitive Skills & Age

Cognitive Skills form after Age 14.

For Children below 14, higher cognitive skills (Strategic, Protective, Organization, Imagination-Integration) are still developing. Therefore, they only receive the 4-quadrant brain map, not the 6 cognitive skills analysis

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

The Goal of DecodeMyBrain™

Brain Dominance Patterns in Research
Most global whole-brain studies show:

- **2-brain dominance** is the most common
- Then **3-brain**
- Then **1-brain** (specialized profiles)
- **4-brain equal dominance** is the least common

A fully balanced **Pie Brain** (equal quadrants) is not natural—and not the goal.

The Goal of DecodeMyBrain™

The aim is **not** to equalize your brain.
The goal is to become **Whole-Brain Skilled** by:

- Maximizing your strengths
- Understanding your challenges
- Developing underused quadrants
- Strengthening cognitive skills
- Becoming flexible, adaptable, and peak-performing

Whole-brain development = **better academics, better relationships, stronger leadership, higher creativity, emotional mastery, and real-life success**

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Your Brain Blueprint Revealed

The Analytical Thinker

You're a fact-driven, analytical thinker who excels at problem-solving and strategic planning. Logical, objective, and direct, you value clarity and evidence. People trust your grounded insights and your ability to deliver precise, well-reasoned solutions.

Your Indices for Future Growth

These indices highlight your key strengths and growth areas for success.

Leadership

Prefer independence; enhancing ability to guide and inspire boosts team effectiveness and influence.

Creativity

Strong logic limits unconventional thinking; developing creativity broadens innovative problem-solving.

GIG Potential

Structure-loving mindset resists fast-paced change; adapting to uncertainty boosts growth potential.

Entrepreneurship

Risk aversion hinders ventures; building confidence in opportunity recognition fosters entrepreneurial success.

Team Collaboration

Excellent solo worker; improving communication enhances team integration and synergy.

21st-Century Agility

Adapting slowly to change; embracing technology and learning boosts modern workplace resilience.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Your Preferred

Studying & Learning Styles

With an Analytical Brain, you learn best through structure, logic, and detail.

Tips to Enhance Learning

- Choose structured programs.
- Use data and evidence.
- Use analytical tools.
- Study solo first, then discuss.

	Learning Style		Preferred Techniques	Effective Tools
	Logical/Mathematical Learning	You learn best using reasoning, logic, and data patterns.	Break down concepts using logic, flowcharts, and algorithms.	Analytical software, step-by-step guides, problem-solving tasks.
	Sequential Learning	You need structure and a clear step-by-step process.	Study in logical order using outlines and schedules.	Study planners, chapter summaries, syllabus-based courses.
	Verbal (Linguistic) Learning	You understand structured, detailed verbal explanations.	Read and summarize textbooks using technical language.	Lecture notes, podcasts, flashcards, writing tools.
	Reflective Learning	You learn best through solitary study and reflection.	Study independently, pause for reflection, ask clarifying questions.	Quiet space, journals, scheduled study breaks.
	Detail-Oriented Learning	You focus deeply and dislike vague or superficial info.	Take meticulous notes, review thoroughly before moving on.	Academic journals, deep reading, quizzes.
	Problem-Solving Learning	You learn through applying theory to real-world problems.	Use case studies, simulations, and critical thinking games.	Case templates, coding apps, scenario challenges.

Study best in structured, logical environments using data, analytical tools, and solo reflection—then reinforce learning through thoughtful discussion.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Your Preferred

Extracurricular Activities

Analytical minds thrive in strategic, precise activities with structure, clear rules, and individual decision-making.

Benefits

- Enhances critical decision-making
- Supports structured thinking
- Encourages precision and focus
- Builds independent problem-solving skills

Here's a breakdown of sports and extracurricular activities that align with your strengths:

Individual Sports

Individual sports enhance focus, strategy, and measurable self-improvement.

Recommended:

- **Tennis:** Strategy and anticipation
- **Golf:** Precision and planning
- **Swimming:** Goal-focused technique
- **Fencing:** Tactical quick-thinking
- **Archery:** Precision and control

Strategic Team Sports

Strategic team sports suit your tactical, analytical mindset.

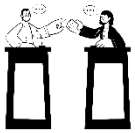

Recommended:

- **Soccer (Football):**Strategic positional play
- **Basketball:Real-time game reading**
- **Cricket:**Team-based strategy
- **Baseball:**Tactical game management

Mind Sports

Mind sports enhance strategic thinking and quick logical analysis.

Recommended:

- **Chess:**Strategic foresight
- **Debate Team:**Logical argumentation
- **Mathematics Competitions:**Timed problem-solving
- **Quiz Bowl/Trivia:**Fast factual recall

STEM Extracurriculars

STEM activities match your logic-driven, problem-solving strengths.

Recommended:

- **Robotics Club:**Build and program
- **Coding/Programming** Clubs:Logical coding solutions
- **Science Olympiad:**Scientific problem-solving
- **Math Club:**Advanced math puzzles
- **Engineering Projects:**Real-world solutions

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Your Preferred

Communication and Behavior

Logical, candid communicator who values clarity, objectivity, and direct expression.

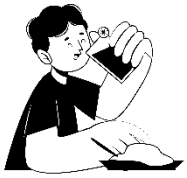

Tips to Improve

- Promotes honest conversations
- Reduces misunderstandings
- Supports rational decision-making
- Enhances efficient collaboration

Communication Style		Strengths	Challenges
Direct and Candid	You communicate clearly, valuing honesty and getting straight to the point.	Seen as reliable; gives constructive, fact-based feedback.	May seem blunt; can intimidate sensitive individuals.
Fact-Based Communication	You prefer logic and data over emotions in discussions.	Arguments carry weight; keep discussions practical.	Struggles with emotional or subjective conversations.
Listening for Logical Flow	You focus on structure and actionable outcomes in conversations.	Spot logical gaps; summarize insights well.	May miss emotional cues needing empathy.
Preference for Structured Communication	You dislike vague conversations and value organized dialogue.	Drives efficient, outcome-focused discussions.	Social chats may feel unproductive; may appear impatient.

Behavioural Tendencies		Strengths	Challenges
Problem-Solving Orientation	You analyze and break down challenges logically to find solutions.	Calm, rational thinker; dependable in complex situations.	May overlook emotional needs during conflict or teamwork.
Independent and Self-Sufficient	You prefer autonomy and managing tasks independently.	Highly productive; initiates and completes tasks solo.	May appear aloof; misses out on collaboration benefits.
Detail-Oriented and Perfectionistic	You focus on accuracy and quality, ensuring nothing is overlooked.	Consistently high-quality output; ideal in precision-demanding environments.	Can delay tasks; struggles to delegate.
Systematic and Methodical	You create plans and follow logical steps to reach goals.	Brings order and reliability to projects.	Struggles with spontaneity or last-minute changes.
Conflict Resolution Style	You handle conflict using facts and direct, logical communication.	Efficient resolution; avoids misunderstandings.	May seem unemotional; needs to validate others' feelings more.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Your Preferred

Diet & Nutrition

Logical, efficient eater focused on health, structure, and performance.

Best Habits

- Meal planning
- Nutrient tracking
- Mindful eating
- Research-based choices
- Consistent routine
- Control portions
- Hydration tracking

Structured Meal Planning

Organized meals with portion control and nutritional balance.

Nutritional Value Focus

Reads labels and chooses meals for brain-body benefit.

Mindful Eating

Focused, intentional eating to enhance satisfaction and control.

Evidence-Based Choices

Selects diets backed by science and proven benefits.

Routine & Portion Control

Follows regular meal times for stability and performance.

Hydration Awareness

Tracks water intake to boost cognitive and physical health.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Your Preferred

Job and Work

Analytical minds thrive in structured, data-driven careers requiring logic and precision.

Ideal Work Settings

- Structured Environments
- Data-Driven Roles
- Independent Workspaces
- Problem-Solving Fields
- Precision-Oriented Jobs
- Tech & Engineering Domains

Logical Reasoning

You prioritize facts and structured thought when making decisions.

Strategic Planner

You excel at organizing, forecasting, and implementing structured solutions.

Detail Oriented

You focus on accuracy, precision, and avoiding mistakes.

Data Analytics

You excel at interpreting numbers, patterns, and factual insights.

Independent Thinking

You prefer autonomy and self-guided work over team dependence.

Logical Decision-Making

You prioritize facts and reasoning over emotion or impulse.

Technical Aptitude

You're drawn to systems, tools, coding, and technical challenges.

Evidence Based

You rely on research and proven data before forming conclusions.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Develop Your Brain Flow & Grow

Flow & Grow helps Analytical Brains align strengths for structured growth, performance, and balanced living.

Outcomes

- Increased focus
- Strategic growth
- Stronger communication
- Balanced lifestyle

Self-Awareness of Strengths

Understand your logic-driven skills to align with high-impact, fulfilling environments.

Use Strengths to Grow

Apply analytical thinking to solve challenges and set measurable personal/professional goals.

Achieve Flow

Engage deeply in tasks matching skill level for peak performance and satisfaction.

Communicate Effectively

Adapt direct style to connect better with emotional and relational thinkers.

Learn Continuously

Pursue structured, intellectually stimulating development through courses, challenges, or strategic goals.

Balance Work and Life

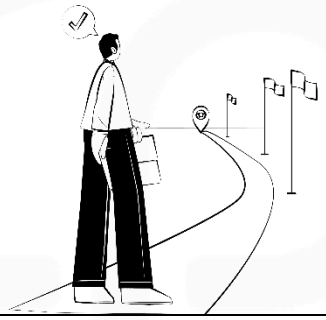

Use structure to manage time for productivity, rest, and meaningful personal growth.

hello@decodemybrain.com www. decodemybrain.com +971 58 5602 551

Designing a Future-Ready You!

Congratulations on completing your DecodeMyBrain report! This is the first step in discovering how your brain uniquely thinks, learns, and solves problems. You've just uncovered your dominant thinking style—but remember, every brain has all four styles within it: Analytical, Practical, Creative, and Relational.

Now begins the exciting journey of **building whole-brain capacity**. That means not just excelling in what comes naturally to you, but also **growing the other thinking styles** through practice, new experiences, and mindful challenges. By strengthening all parts of your brain, you'll become more adaptable, confident, and ready for any situation in school, life, or future careers.
Keep exploring, stay curious, and embrace every opportunity to grow your limitless brain!

This is more than a profiling tool.

It's a call to action:

- **to know yourself**
- **grow yourself**
- **and design a life where your mind is limitless.**

DecodemyBrain
