DOCUMENT Project Deliverables Phased build plan + workflow diagrams	PROJECT DecodeMyBrain® decodemybrain.com	TIMELINE 15–23 Working Days 3–5 weeks · 7 phases · 1 developer	PREPARED 21 June 2026 Ref: DMB-2026-DEL-01
---	--	--	--

01 — Mission & Locked Decisions

One Native Laravel App. No WordPress. No WooCommerce.

The logged-in member platform — assessments, scoring, PDF reports, Stripe checkout — is already built. The rebuild adds the public frontend and a simplified pay-first purchase flow around it. Nothing in the existing member engine changes.

Pay-First Funnel

No free plan. Register and pay in one step. Credentials emailed after payment. Assessment unlocks on first login.

Age-Routed Assessments

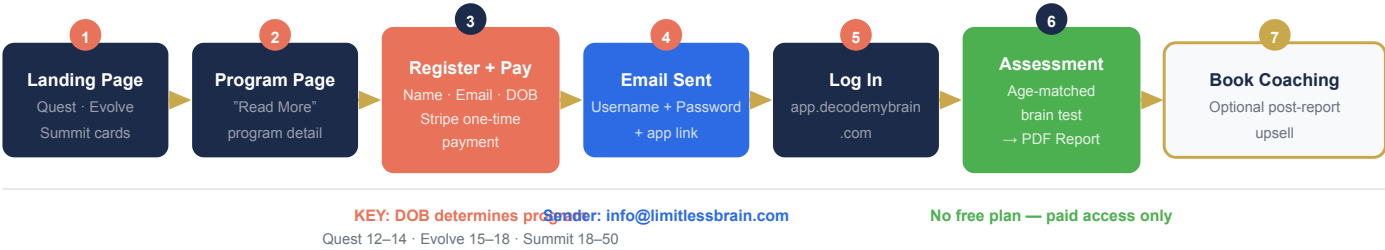

Date of birth at registration auto-determines Quest, Evolve, or Summit. No manual program selection needed.

WordPress Cord Cut

WooCommerce replaced by Stripe Cashier. WP user bridge retired. Native MySQL becomes the single source of truth.

02 — Individual User Purchase Flow

7 Steps from Discovery to Brain Report

Registration and payment happen in one step — no separate sign-up. Stripe Cashier handles the one-time payment. Credentials are auto-emailed post-payment. No free tier exists.

03 — Programs & Age Routing

PROGRAM	AGE RANGE	TAGLINE	ASSESSMENT SERVED
Quest	12–14 years	Building Strong Foundations for Future Success	Quest brain questionnaire
Evolve	15–18 years	Guiding Teens Towards a Successful Career	Evolve brain questionnaire
Summit	18–50 years	Unlocking Lifelong Growth and Fulfillment	Summit / adult questionnaire

DOB entered at registration is the only routing signal. The system selects the correct assessment automatically — the user never manually picks a program after paying.

The Journey Inside the Platform

"When I designed DecodeMyBrain, I wanted every family to feel that science was working quietly in the background — not that they were filling forms. Here is what actually happens the moment someone trusts us with their brain."

— Dr. Sweta Adatia, MBBS MD DNB(Neurology) FACP MBA(Cambridge), Founder

- 1

You arrive. We do not ask for much — just your name, email, and date of birth.

REGISTRATION

That date of birth is everything. Our system instantly looks at it and routes you to the correct program — Quest for a child between 12 and 14, Evolve for a teenager from 15 to 18, Summit for an adult. No dropdown. No confusion. The brain science knows your stage of life already. Under the hood, the Laravel backend writes your record to the `users` table in MySQL, hashes your details, and stamps a `dob` field that drives every decision from here.
- 2

You pay once. We unlock a lifetime of insight.

STRIPE CASHIER

Stripe handles your card. When payment clears, a webhook fires instantly to our server. Our `StripeWebhookController` receives it, verifies the signature, and calls `EntitlementService` to write your package slug — `decodemybrain-deep-dive` or equivalent — to the `users` table. The `RequirePaidPackage` middleware now opens every assessment route for you. This takes less than two seconds after you click Pay.
- 3

An email arrives with your key.

LARAVEL MAIL

Immediately after entitlement is confirmed, our mail system sends your credentials — username, auto-generated password, and a direct link to `app.decodemybrain.com`. The email goes from `info@limitlessbrain.com`. There is no waiting room. You open the email, click the link, and you are inside.
- 4

The assessment begins. 100+ questions that reveal your whole brain.

QUESTIONSCONTROLLER

Your questionnaire is not a personality quiz. It is a neuroscience-backed whole-brain map. The `QuestionsController` serves questions one at a time from the `questions` table, storing each answer in `question_answers` linked to your session. Beyond the core 100+ questions, there are dimensional questions (left-brain / right-brain balance), an introvert-extrovert dimension, a skill assessment, and interactive game-style tasks — all gated by the `AuthQuestionAnswered` middleware so you cannot skip ahead. Your progress is saved after every single answer, so a refresh never loses work.
- 5

Your brain profile is computed.

SCORING ENGINE

When you submit the last answer, our scoring engine reads all your responses from `question_answers`, `dimensional_question_answers`, `introvert_extrovert_question_answers`, and `skill_test_question_answers`. It calculates your scores across five brain dimensions — Analytical, Creative, Emotional, Practical, and Intuitive — and writes them to `brain_scores` and `user_dimensional_score`. This is the moment your unique brain blueprint is born. It usually takes under three seconds.
- 6

Your PDF Report is generated. A personalised blueprint, not a generic printout.

BRAINRESULTSCONTROLLER

The `BrainResultsController` queries your scores and passes them to a Blade PDF template. The template combines your dimension scores, career suggestions, learning strategies, and parenting or self-development insights based on your program. A percentage score per brain quadrant is displayed as a visual chart. The PDF is saved to `public/reports_pdfs/` and linked to your dashboard. You can download it at any time. The admin can also access it from the Super Admin panel.
- 7

You book a coach. We close the loop.

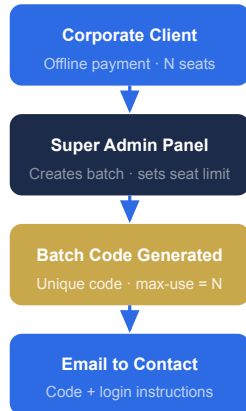

CONSULTATION BOOKING

After your report, your dashboard shows a booking option. Clicking it takes you to a two-step consultation booking flow — pick a time slot, confirm. The booking is saved to the database and an email notification goes to the DecodeMyBrain team. This is optional — the report alone is a complete, stand-alone deliverable. The coaching session deepens it.

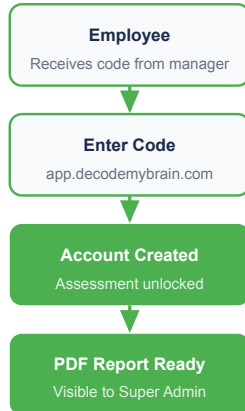

Offline Payment · Batch Codes · Super Admin Visibility

Corporate clients pay offline (invoice / bank transfer). Super Admin generates a unique batch code with a seat limit. The code goes to the corporate contact who shares it with their team. Each employee uses the code to unlock their assessment — no individual payment. Super Admin sees every employee's progress in real time.

06 — What Exists vs. What Gets Built

The Member Platform is Already Live — We Add Around It

ALREADY WORKING — KEEP AS-IS

- + **Auth + Email OTP / 2FA**
Sign-up, login, OTP, password reset
- + **Brain Assessments**
100+ questions, games, dimensional, skill, I/E tests
- + **Scoring + PDF Reports**
Brain-profile computation, Blade PDF generation
- + **Brain Connect (Buddy)**
Comparison requests, accept/reject, results side-by-side
- + **Member Content**
Careers, tips, events, jobs, internships, scholarships
- + **Stripe Cashier Checkout**
Webhook, success/cancel, entitlement grants
- + **Entitlements Middleware**
ValidatePackage, RequirePaidPackage gates
- + **Admin CRUD Panel**
Events, careers, content management

BUILD — PUBLIC FRONTEND + ADMIN UPGRADES

- **Pay-First Purchase Flow**
Flip PAYMENTS_DRIVER=cashier, FUNNEL_MODE=pay_first
- **Post-Payment Credentials Email**
Username + password + app link via info@limitlessbrain.com
- **Shared Public Layout**
Header, footer, Nunito font, coral/gold/green palette
- **4 Forms + DB Tables**
Contact, corporate enquiry, booking, newsletter
- **14 Public Marketing Pages**
Home, Quest, Evolve, Summit, About, Science, LBA, BPB...
- **Shop Grid + Product Pages**
Commerce phase
- **Super Admin User 360 View**
Plan, payment, assessment, report, brain scores per user
- **Bulk Corporate Code Generator**
Seat-limited batch codes with email dispatch

07 — Phase Timeline

15–23 Working Days · 7 Phases · 1 Developer

PHASE 1 · 0.5–1 DAY

Pricing Rebuild + Pay-First Flow + Post-Payment Email

Flip PAYMENTS_DRIVER=cashier and FUNNEL_MODE=pay_first. Update config/packages.php to one-time prices. Rebuild pricing.blade.php. Wire credentials email post-payment. Remove free plan.

PHASE 1 QUICK WIN STRIPE

FOUNDATION · 1–2 DAYS

Shared Layout + Component Library + Cleanup

layouts/public.blade.php — header, footer, nav. Nunito font, coral/gold/green tokens. Delete 12 stale dashboard backup views and QuestionsController copy.php.

FOUNDATION CSS TOKENS

PHASE 2 · 2–3 DAYS

Forms + Data Capture (4 forms, 4 tables, emails to staff)

Contact, Corporate Enquiry, Booking Request, Newsletter — each saves to DB and emails info@limitlessbrain.com.

PHASE 2 DATABASE

MARKETING · 5–8 DAYS

14 Public Pages — Faithful Blade Rebuild (Biggest Phase)

Home, Quest, Evolve, Summit, LBA, Brain Connect, BPB, About, Science, Our Method, Neurodivergence, Contact, Corporate, Booking, Privacy. Screenshot of live page → build in Blade → diff before sign-off.

BIGGEST PHASE 14 PAGES

COMMERCE · 2–3 DAYS

Shop Grid + Product Pages

Product listing grid + individual detail pages, wired to existing Stripe Cashier checkout.

COMMERCE STRIPE

SUPER ADMIN · 2–3 DAYS

User 360 + Transactions + Bulk Code Generator

/admin/users/{id}/360 — plan, payment, assessment, brain scores, PDF link. POST /admin/corporate/generate — creates batch code, emails corporate contact.

ADMIN CORPORATE

Retire WordPress Bridge — Native DB Cutover

Remove routes/api.php WP-sync endpoints, WP SSO bridge, wp_users mirror. Split web.php into public.php / member.php / commerce.php. Full regression test before go-live.

Body · Nav

Font: **Nunito** (Google Fonts). No Elementor or WordPress CSS carried forward. Faithful screenshot-diff per page before sign-off.

11 — What Gets Removed

Cutting the WordPress Cord — Final Phase

ITEM	ACTION	TIMING	REASON
<code>routes/api.php</code> WP-sync endpoints	REMOVE	Decoupling	Dead once native auth active
WordPress SSO / login bridge routes	REMOVE	Decoupling	Replaced by native auth + Cashier
<code>wp_users</code> mirror + <code>wp_user_id</code> column	REMOVE	Final step	Native DB is source of truth
Free plan / free tier UI	REMOVE	Phase 1	Client decision — no free plan
BEGINNING / GOLD / PLATINUM sub-packages	COLLAPSE	Phase 1	Simplified to 1 price per program
12 stale dashboard backup <code>.blade.php</code> files	DELETE	Foundation	Clutter — active file is dashboard.blade.php
<code>QuestionsController copy.php</code>	DELETE	Foundation	Dead duplicate file
Testimonials, team, blog, resources pages	DROP	—	Out of scope by client decision

12 — Open Questions Before Build Starts

5 Client Decisions Needed

- Final price per program**
Config has Deep Dive \$499 and Guided F&F \$999. Confirm final one-time price for Quest, Evolve, and Summit individually. Needed for config/packages.php and .env Stripe price IDs.
- Stripe live credentials**
Currently sandbox-only. Client to share live Stripe account so live price IDs can be set before any real transactions.
- Corporate batch code format**
Alphanumeric? Length? Expiry by date or seat count only? E.g. CORP-7X4K9 format to be confirmed.
- Reference illustration folder per page**
Client to provide design reference assets per public page as the build spec. This is the biggest variable in the Marketing phase estimate (5–8 days).
- Under-12 age handling**
